

:PROJECT ONE

This outline is a work-in-progress, and may change in the future – medatech@medasf.org

Mission Economic Development Agency | Instructor Eduardo Garcia

HOBBY WEB PAGE DESCRIPTION

The hobby page will be your first official HTML project for the MEDA Web Design class. The hobby page is not a portfolio or an about me page, please focus on the hobby when writing your hobby page. A web page evolves over time as you revise and update your content and code, so do not worry over making the first edition perfect. **Expect to dedicate up to four hours to complete this project!**

HOBBY WEB PAGE GOALS

The hobby page should do the following:

- ➔ Introduce yourself and your hobby.
- ➔ Describe why you enjoy doing this hobby.
- ➔ Instructs a visitor on how to start your hobby, specifically for someone that has never done your hobby before.
- ➔ Links to online resources or videos where a visitor can visit to further develop their skills in your hobby.
- ➔ Display example images of the hobby that you have taken yourself.
- ➔ Display generic images or images from the Internet related to your hobby.

CREATING YOUR HOBBY PAGE

- A) Write out in a plain text file a **minimum of three paragraphs**. The first paragraph should cover a little bit about yourself, your hobby, and why you enjoy doing it. The second paragraph should contain instructions on how to do your hobby for someone that has never done your hobby. The third paragraph should provide additional tips and as well as online resources that the visitor can check out in order to further develop their skills in your hobby. If your hobby is in depth, please feel free to write more paragraphs. **All paragraphs should be 4 to 6 sentences long!**

- B) **Take a minimum of three images with a camera** (smartphone cameras OK) that show your hobby products or process.
- C) Find a minimum of three images on the internet that relate to your hobby and have a **license that allows you to use the image for this project**. Most licenses just require giving credit, but please find the license of the image to clarify what you can and can't do!
- D) Create your HTML file and start copying and pasting your paragraphs, please use p, h1, h2, h3, a, and img HTML tags as you see fit, but please make sure the use of HTML elements is proper (e.g. Do not use h2 just to make the text bigger, h2 are generally for sub-sections of h1). **Please note you are not limited to just these HTML elements.**
- E) At the end of the web page, make an Appendix list that includes hyperlinks to resources, references, and image credits. If you already used your hyperlinks inside of your paragraphs, please put a copy of those hyperlinks in this list as well.

RUBRIC

MEDA Web Design Projects are graded with a Pass or No Pass. In order to get a Pass for the hobby page, you need to meet the following requirements by the deadline:

- ✓ A minimum of three paragraphs of text.
- ✓ A total minimum of six images.
- ✓ A minimum of three hyperlinks to other websites involving your hobby.
- ✓ An HTML web page holding the previously mentioned content.
- ✓ An Appendix listing all resource links and image credit links.

This project will be worked on in the following weeks. Please make sure you have the content as described in the rubric section.

Please make sure to have your project files inside a folder with the name “hobby”. The hobby folder should be inside of the “projects” folder. The projects folder should be inside of your Git Repository.

This project is due on February 5, 2021
